

**Pre-programmed Your Uniden BC95XLT for the 2009 Races**

**We will program your scanner with the following race.**

**Sprint Cup Series (NASCAR)**

The BC95xlt is only capable of holding 200 frequencies. Because of this we are only able to program this scanner for one race (Sprint). If you would like a scanner that is able to hold more frequencies you should consider the SC230. We load four races when programming this scanner. We load the Sprint, Nationwide, Craftsman, and IRL frequencies. The SC230 also has alpha numeric display which allows us to input the driver's name and number. The BC95xlt will only display the driver's frequency number.
