

BearcatWarehouse.com

Hometown Programming Package

Scanner programmed by Bearcat warehouse's national frequency experts.

Included: Local Police, Fire, and the county sheriff/police and fire frequencies. We will use your billing address on your order unless you e-mail us first and let us know the city/county you wish to have the radio programmed.

State Police/Highway Patrol, nearby cities and counties, EMS channels and more can be added for an additional fee. Send an email to admin@bearcatwarehouse.com for special request. We will get back to you with a quote for the additional programming.

Please add special request in the order comment section. We cannot guarantee that we will be able to make use of the information, or do so for the Hometown programming price, but we will do our best. Some programming requests we cannot meet for the Hometown price. For example if you would like all the programming for a major city, particularly for low-end models which require programming to be done by hand, we will need to work with you to refine your options.

If you are unsure of which scanner will work in your area send an email to admin@bearcatwarehouse.com with your county and state. You can also check radioreference.com in the rrdatabase section to do your own research.

Terms and Conditions: Hometown Programming may add an additional week for delivery. Once your scanner has been programmed, Hometown radios are returnable only for a store credit or exchange within 14 days of delivery for the price of the radio only. Programming fees are not refundable or creditable. (Re-stocking charges may apply if the radio, accessories or the packaging are not returned in original condition.)
